SUMMARY

Result-oriented Data Analyst with nearly 1.5 years of comprehensive experience, including internship tenure. Proficient in data analysis, visualization, and ETL, with excellent communication and collaboration abilities. Skilled at working effectively in both independent and team-oriented environments.

TECHNICAL SKILLS

- **Languages** - C++, Python, SQL, XML, HTML, CSS
- **Computing Services** - AWS (Basic)
- **Tools** - Power BI, PowerCenter, Tableau, Informatica (IICS/IDMC), Git, Bitbucket, Jira
- **Software Development Methodology** – Agile, Waterfall

PROFESSIONAL EXPERIENCE

- Graduate Engineering Trainee | Sunlife Global Solutions** **Aug 2023 - Present**
 - Worked on IDMC formerly known as IICS, various kinds of transformations, build mappings to convert CSV files into XML using hierarchy builder transformation.
 - Successfully completed comprehensive training in PowerCenter, AWS Glue, Athena, Python, and Kafka technologies.
- Data Analyst Trainee | Anheuser Busch InBev** **July 2022 - Jan 2023**
 - Worked on building Dashboards in Power BI, did enhancement of already built dashboards, increasing efficiency, and decreasing the data load on the dashboards for smooth & fast running.
 - Worked as a Product Owner Intern.
 - Conducting market research, creating prototypes, helping Product Managers in making PRD and BRD.

PROJECTS

- GRS_YW**
 - This project aims to convert CSV-formatted unclaimed properties data into XML.
 - In my role, I utilized IDMC for data transformations, including source file retrieval, configuration, CSV to XML conversion, and task flow creation. Leveraging shell scripting, I orchestrated data manipulation and output file placement onto LAN shares.
- BEES**
 - To create a Power BI dashboard for BEES Marketplace and transform the reporting of Marketplace P&L and KPIs.
 - Include Cockpit view for the BEES Leadership team, P&L comparison with COGNOS data.
- CWG_OTC**
 - It brings the visibility for OTC related KPI's. Enable the business with dashboard for everyday operations.
 - One stop dashboard for all the OTC process which will help the business.

RESEARCH PUBLICATION

- MACHINE LEARNING IN THE NEWSROOM: A News Frontier in the Fight Against Misinformation, ICCS KILBY100, 2023**
 - Researched machine learning methods for online fake news detection, proposing a robust ensemble model integrating seven algorithms, achieving 99% accuracy across diverse datasets, demonstrating significant potential in countering digital disinformation.

EDUCATION

Lovely Professional University | Jalandhar
B. TECH in Computer Science & Engineering

2019 - 2023
CGPA - 8.7
